

My name is Jason Malloy and being nominated as the Recording Secretary for the MIAAA is an amazingly humbling honor. The MIAAA has provided me so many opportunities to advance my career as an athletic administrator and to be asked to be a part of this organization is rewarding beyond measure. Each year I have taken advantage of the opportunity to grow in some area of the position of athletic director at the MIAAA Conference. I have now begun to use the resources and knowledge that I have obtained from the MIAAA Conference and its members to help mentor others who are new and upcoming athletic administrators. I appreciate you taking the time to read this, and I hope you participate and vote in this year's election.

Please take a quick look at some of my work history and my WHY below. I have served as a teacher in the elementary, Dean of Students in the middle school, college football coach, and now a high school athletic director. The I worked with someone this summer and it helped me define who I was an educator. Three things that define me is that I am a **family man, mentor, and relationship builder**.

I once read a quote by William Ward that read "The mediocre teacher tells. The good teacher explains. The superior teacher demonstrates. The great teacher inspires.". This quote truly defines who I am as an educator. I have been teaching and coaching since 2004, which is 20 years. Working in education is not a job for me, it's my mission. The students that I have taught, coached and impacted are a part of my life forever. I don't view my job as just something I do, I am inspired to change lives and use my position of influence in education to changes lives.

I believe in relationships, character, integrity, and team work. I choose to lead by example by the way that I live my life on a daily basis. I have been blessed with a gift to be able to connect with young men and women through this platform. My message has always gone beyond the sports fields. I reach into their lives preaching family values, the importance of education and the expectation to carry themselves as a positive role model in their community. For me, it is imperative that my student-athletes are ready for the real world. When the ball goes flat, what is next? As a coach, educator, and administrator the goal has been the same. The goal is to use sports as a vehicle to help the student-athletes be prepared for life. If we can cultivate the minds of those who work with our students directly each day, we have then begun the change process. I hope to continue to lead by example as we move students academically and athletically into the new millennium.

EDUCATION

- **Michigan Secondary Association of Secondary Principals-** School Administrator Certificate K-12
- **Central Michigan University-** Mt. Pleasant, MI – Masters of Art in Sports Administration
- **Western Michigan University,** Kalamazoo MI – Bachelor of Science in Education with Math, Science and Physical Education
